“Masternodes Will Be Huge in 2018 – Are Masternodes the New Mining?”

N1NJA WTF
DECEMBER 16, 2017

INTRODUCTION

Since late 2017, several crypto specialists have stated that masternode coins “will be huge in the upcoming years”. After only five months into 2018, we can already see it, masternodes are becoming the new mining

It makes sense if you think about it.

Why would anyone buy overpriced GPUs and get those massive power bills, just to mine a coin that could lose half its value overnight?

Savvy investors are starting to realize that, by investing in masternodes, they are building a portfolio of passive income generating assets

Read that again: Masternodes are passive income generating assets.

Let me give you a quick example: Dash, the first coin to implement masternodes.

Did you know that original Dash masternodes were setup when the coin was about \$1? Yep, that means people who invested about \$1,000 in 1000 DASH and got their masternode four years ago have been generating passive income for all this time

But that’s not it!

The 1000 DASH masternode collateral those people purchased for about \$1,000 were worth more than \$1.6 million in December 2017 and even with all the lows of 2018, that same DASH is now worth \$305 thousand.

They generated passive income for the last fours years and their initial investment is now worth 305x or 30500% more.

But there is a catch, yes, there’s always a catch...

98.5% of crypto investors have no idea how to setup, maintain and run a masternode.

Different coins have different technical requirements to run their masternodes and, let’s be honest, most investors don’t want to learn complicated linux commands or how have time to deal with Ubuntu VPS’ security updates.

They want to make money, period. Don’t you?

Well, that’s exactly what MANO is here for.

The Masternode Foundation is the project that will break those barriers holding back investors from adding these passive income generating assets called masternodes to their crypto portfolio.

The MasterNode Foundation Services

MANO Host

Our exclusive \$5 one-click masternode hosting service eliminates today's most common difficulty for masternode investors.

From now on, any investor will be able to click and launch a full masternode without previous linux command line or even wallet console knowledge.

By choosing only Tier 1 providers, such as Amazon Web Services, Google Cloud, Digital Ocean and OVH, we will be able to provide world-class redundant scalable infrastructure with a never-offered-before 99.9% Service Level Agreement (SLA) Guarantee.

Automated Shared Masternode Service

An exclusive 2% fee Shared Masternode Automated Platform which offers the possibility of joining any **coin shared masternodes automatically** without waiting or interacting with anyone.

Traditional shared masternodes services are known to be inefficient, tedious and difficult to audit, our automated platform has always vacancy for new shares so the investor starts earning immediately instead of waiting for a new masternode to be set up.

Masternode Rankings

The most comprehensive masternode coins listing and comparison platform ever created, featuring "Node Monitor" a masternode monitoring service with e-mail, mobile and push alerts for investors who want to be notified in real time if their masternodes have any issues.

The **Node Monitor Android and iOS apps** will allow masternode owners to be constantly aware of their investment statuses regardless of their location.

MANO Exchange

A masternode coin exclusive exchange where masternode owners can receive their rewards directly and trade them automatically if they choose to do so.

MANO Technical Specifications

- **Symbol: MANO**
- **Address Prefix: M**
- **Block Reward: 10 MANO**
- **Masternode Collateral: 1000 MANO**
- **Block Reward Distribution: 5/5 (50% Miner / 50% Masternode)**
- **PoW Algorithm: Lyra2z**
- **Block time: 120 seconds**
- **Diff Retargeting: DGWv3**
- **Halving: 12 months**
- **P2P Port: 5982**
- **RPC Port: 5983**
- **Max Supply: 12,614,400 MANO**
- **Premine: 3%**

Masternode Foundation's Initial Roadmap

- **June 2018: MANO Coin Blockchain Initial Launch**
- **July 2018: MANO Host - One-click Masternode Services for Everyone.**
- **August 2018: Shared Masternodes Platform - Automated Shared Masternode Investing.**
- **October 2018: Masternode Rankings - The Coin Market Cap of Masternode Coins.**
- **January 2019: MANO Exchange - The Crypto Exchange for the Smart Masternode Investor.**
- **March 2019: MANO Fund - A Masternode Investment Fund ruled by Decentralized Governance.**
